

SWAPNIKA MOHANTY

Hyderabad, Telangana | +91 91000 08991 | swapnikamohanty2006@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Motivated B.Tech student (4th Year, 9.7 CGPA) with hands-on experience in Data Analytics, Machine Learning, Python, SQL, and Excel. Built AI-driven projects using predictive modeling, NLP, Flask, and web development. Proficient in Pandas, NumPy, Scikit-learn, MySQL, and advanced Excel. Seeking a Data Analytics or Software Development Internship to apply analytical and problem-solving skills.

EDUCATION

Bachelor of Technology (B.Tech)

Expected Graduation: May 2027

Chaitanya Deemed to be University — 4th Year, 7th Semester | CGPA: 9.7 / 10.0

TECHNICAL SKILLS

- Web Development: Flask, HTML, CSS, REST APIs
- Programming: Python, MySQL
- AI/NLP: NLP, LangChain, LLM Integration (Groq API), Keyword Matching, Recommendation Systems
- Machine Learning: Pandas, NumPy, Scikit-learn, Predictive Modeling
- SQL: Joins, Subqueries, Window Functions, Aggregations
- Data & Analytics: Excel (Pivot Tables, VLOOKUP), Data Cleaning, EDA
- Soft Skills: Communication, Problem Solving, Presentation Skills

KEY PROJECTS

AI Legal Document Assistant – AI-Powered Legal Document Analysis

Python, Flask, Groq LLM API, PyPDF, python-docx, NLP, ReportLab

- Built a Flask application that analyzes legal documents (rental agreements, employment contracts, NDAs, service agreements) using PDF/DOCX text extraction and Groq LLM-based analysis.
- Implemented risk identification, missing-clause detection, key information extraction, and automated document scoring.
- Developed an AI chat feature for document Q&A, simplification, multilingual Indian-language translation, and automated PDF report generation.

ResumeIQ AI – AI Resume Analyzer & Career Coach

Python, Flask, LangChain, Groq LLM API, NLP, Bootstrap 5

- Built a full-stack AI web application using Flask, LangChain, and the Groq LLM API to parse PDF/DOCX resumes and generate personalized career insights.
- Implemented NLP-based skill extraction, ATS compatibility scoring, job role prediction, and an interactive dashboard with skill-gap analysis and career roadmaps.
- Developed LLM-powered features including resume rewriting, job description matching, interview question generation, and cover letter generation.

EpiPredict AI – ML-Based Epidemic Spread Prediction Dashboard / Mar 2026

[GitHub](#) | Python, Pandas, NumPy, Scikit-learn, Streamlit, Matplotlib

- Built an ML dashboard to predict COVID-19 case trends using Linear Regression and Johns Hopkins data.
- Developed an end-to-end pipeline for data preprocessing, model training, and country-wise forecasting.

Skill Path Finder – AI-Based Career Guidance System / 2025

Python, Flask, HTML, CSS, NLP, Render

- Developed an AI web application that recommends career paths based on students' skills using NLP-based skill extraction and matching.
- Built a responsive Flask application and deployed it on Render.

CERTIFICATIONS & ACHIEVEMENTS

- Deloitte Data Analytics Job Simulation (Forage) – Data analysis and visualization for a simulated client engagement.
- TCS iON Career Edge – Young Professional: Communication, Resume Writing, Interview Skills, Business Etiquette, AI & IT Fundamentals.
- YUVA AI For All (IndiaAI & TCS iON): Foundations of Artificial Intelligence and Responsible AI.
- TCS iON Communication Skills: Professional verbal and workplace communication.
- TCS iON Career Edge – IT Primer: IT fundamentals, emerging technologies, and career readiness.

LANGUAGES

English, Hindi, Telugu, Odia
